- Follow-up and satisfaction indicators

Training Models

- Normal classes
- Panel Group case discussion
- Project Oriented Training (the output will be a product or real system)
- Virtual Training for the professionals

Ma3bar Should concentrate on the advanced training and the basic training should be carried out by the local partner.

Expected Outcomes from Ma3bar

- Training Material preparation:
 - the awareness courses (*Concepts, Benefits, ethical and legal, Business Model for FOSS*),
 - The Basic Training courses, the current HOT areasetc)
- Arrange the Basic Training Certificate for the FOSS
- Keep list of the Available FOSS Training resources and applications
- Arrange training programs for training trainers on the current HOT areas.

Expected Outcomes from Ma3bar

- Building list of expertise
 - Partners to send their expertise to be compiled
- Build a network of trainers from the participating partners and nominate a training coordinator
- Interactive portal with partners' know-how
- Prepare master plan for training

- When successful it will become auto-sustainable
 - Define bylaws
